To Whom It May Concern:

This letter is in reference to the Prochaska & Associates architectural firm.

Our City is using Prochaska & Associates for the design and construction of a new public safety center that will include the police department, city administrative offices and fire department.

The expertise, professionalism and experience that this firm brings to the table is second to none. During the initial phase of the project, we found the staff to be very knowledgeable and receptive of our ideas. The City of McCook recently passed a bond issue for this project. We look forward to working with Prochaska & Associates and moving this project forward to completion.

We would highly recommend Prochaska & Associates to any community that is considering constructing or renovating a Fire Department or Public Safety Center.

If you have any further questions, please feel free to contact me at the fire department at 308-345-5710 or via email at firechief@mccooknet.com

Sincerely,

**Marc A. Harpham
Fire/EMS Chief
City of McCook Fire Department**
