Omaha, Nebraska 68154

To All at Prochaska & Associates:

Both the staff and I at Estes Park Medical Center are extremely pleased with the new design of our Critical Access Hospital. The Estes Park community was particularly concerned that the aesthetic theme might appear “too woody” given its location in the Rocky Mountains. The Prochaska & Associates staff took great care in the programming and design, creating a sophisticated and classy, yet natural balance. The exterior provides our guests with a warm welcome that is continually reflected throughout our interiors. The hallways, waiting rooms, and patient rooms provide the Planetree healing effects, creating both a therapeutic and a calming environment for both patients and staff. By working together as a part of the team with Prochaska & Associates throughout the stages of design, we now realize how important staff participation is in its ownership. We look forward to Phase I completion this Fall and are anxious to begin the next phase.

Again, Thank You for all your efforts and a job well done.

Sincerely,

Estes Park Medical Center

Karna Schofer
